

Wine Cozy

by Sheila Reinke

You have guests over, and everyone has a wine glass, but keeping track of those glasses and getting people to remember to use a coaster is a problem. The wine cozy is an attractive and fun way to solve both problems.

Please note, images used in this pattern are NOT to scale

Materials - *note: these instructions are to make ONE cozy*

- 5" strip of cotton print or solid fabric - or 1 fat quarter
- 4" square of thin cotton batting

Suggested Tools

(beyond standard sewing supplies)

- OLFA Circle Cutter
- Self Healing Mat

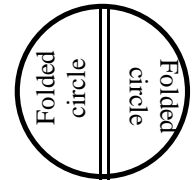

Project Level: Beginner

Cut fabric as follows:

- Cotton Print: cut 4 circles with a 4" diameter
- Cotton Batting: cut 1 circles with a 3½" diameter

Construction –

- Sandwich the batting circle between two of the fabric circles with right sides facing out on fabric circles (so bottom fabric is right side down, then batting, then top fabric with right side up).
- Take remaining two circles and fold in half, ironing the fold sharply.
- Lay folded circles on top of the sandwich, with the folded edges touching so the two half circles (folded circles) make a whole circle on top of the fabric sandwich. This area with the fold is where the foot of the wine glass will insert.
- Pin all layers together, making sure you catch each of the folded pieces separately.
- Stitch around the sandwich, catching all layers of the fabric (bottom piece, batting, top piece and each of the folded pieces) into a ¼" seam.
- Clip the selvage, allowing you to more easily turn the circle out.
- Using the opening at center of the circle (folds) turning it right side out. Iron cozy flat.
- To use, insert the base of your wine goblet. Create a variety of cozys out of different fabrics - now everyone will know which glass is theirs.
